TEGOLIGHT®
guaranteed easy installation

LEDTEC

Our TegoLight® light track is available in two versions:

1. Robust aluminium profile with protective plastic cover.
2. High-quality PMMA profile with protective plastic cover.

INSTALLATION

TegoLight® can be easily inserted into the side of the outer shelf profile.

No tools are required for installation. The TegoLight® light rail is mounted almost invisibly under the shelf and therefore does not interfere with the filling and removal of goods.

ADVANTAGES:

- available for shelves from 500 - 1330 mm
- authentic product illumination
- very good energy efficiency (>130 lm/W)
- long service life

SPECIAL FEATURES:

- invisible integration into the shelf
- homogeneous illumination of the goods
- simple electrification via track possible
- tool-free assembly
